## About the company

Qplox is a fast-growing company offering test and automation engineering. Headquartered in Leuven, with offices in Barcelona and Eindhoven.

Our clients are major multinational enterprises and local companies from automotive, semiconductors, RF, consumer electronics.... Our Test automation group offers a one stop shop for design of automated test benches, system integration production, lab automation and data acquisition systems, with a growing focus in IoT sensor networks.

Our consultancy department offers services in RF, semiconductors and electronics design and test, as well as on the crossing roads of Nanotechnology, Bio-Science Engineering and Biotechnology.

## Job Description

Our client is seeking a Standardization Expert (3GPP) with expertise in wireless communication technologies and standards developed by 3GPP. The role involves attending 3GPP Working Group (WG) meetings such as RAN1 (preferred), RAN4, representing our client's interests. The successful candidate will contribute to technical discussions, collaborate with global telecom companies, and influence standardization strategies and timelines.

### Responsibilities

- Attend 3GPP meetings (e.g., RAN1, RAN4) as a delegate, engaging with global telecom companies and vendors.
- Develop and implement standardization strategies, influencing timelines and strategies within 3GPP.
- Translate business requirements into technical specifications, guiding R&D and standardization teams.
- Report to the Director (European Standardization & Industry Development), based in Leuven (Belgium), with oversight in the UK.
- Mentor team members, ensuring best practices and high standards.
- International travel required (50%).

Location: Leuven (Belgium) or Reading (UK)

Travel requirements: Extensive international travel required (50% of the time)

---

## Candidate Description

- Knowledge of 3GPP wireless communication technologies and standards.
- Experience as a 3GPP delegate.
- Strong communication skills, including intercultural communication.
- Ability to understand business requirements and translate them into technical solutions.
- Fluent in English, both spoken and written.
- Desirable skills: adaptability, time management, stress management, conflict management.
